

## SWASH: Fall Fashion

### REPORTER OC

Between midterms, volleyball practice, and play rehearsals, you probably don't have a lot of time to devote to fashion. Lucky for you, we've been keeping an eye on what's hot this Fall.

First of all, plaid is back in a big way. It's showing up on skirts, bags, even boots. But remember, a little bit is fun, too much is tacky.

You also want to get your hands on some floral prints. Yes, I know it's Fall, but flowers are staying in season this year. Designers are putting spring-like patterns in their Fall collections, and who are we to argue with them?

And of course, wrinkles are never in style. So take a look at Swash Smooth It Out spray. They say that with a few spritzes of this, along with gently tugging and smoothing the fabric, even something you wore yesterday will be ready to wear.

**SWASH: Date**

**REPORTER OC**

**You finally worked up the courage to ask that cute girl in your seminar on a date. Now all you have to do is convince her you're not a total slob.**

**Wear a nice pair of shoes. I know you think your two-year-old sneakers are appropriate for all occasions. But girls are biologically programmed to pay more attention to footwear. If your feet look good, it'll register with her.**

**Obviously, you're concentrating on getting yourself fixed up. But pay some attention to your room, too. If the evening goes well and you have a shot at bringing her back there, what will she see? This might be a good time to get rid of the pizza box from last week, and you may want to think about cleaning the bathroom.**

**And while you're tackling that, take your lucky date shirt you wore in that smoky bar and spray it with Swash Fresh it Up. Then she'll never suspect you had a date *last* night.**

## SWASH: Formals

### REPORTER OC

The weather's getting colder, and ladies, you know what that means: fraternity formals. When the big night rolls around, here are some tips for looking your best.

Take some clear lip gloss, and dab just a little bit on your cheeks. It'll give you a dewy, fresh-faced look. Not too much, though. Otherwise, you'll just look like you have lip gloss on your face.

When you pull your dress over your head and look in the mirror, there's a good chance you'll see deodorant streaks staring back at you. To get rid of them, rub them with a pair of nylon stockings.

And even though your date is dressed to the nines, he's still a frat boy, which means he's going to spill something on you. So toss a Swash Get It Out pen in your purse. It'll help remove many fresh food and drink stains before they have a chance to ruin your dress, and your night.
